# Ariel

MODECOM ARIEL is an ATX computer case with multiple applications. Designed in the spirit of modern elegance, ARIEL will fit every interior, both in your office and at home. Spacious interior with wiring organisation system will contain all components necessary for making up a powerful computer. ARIEL computer case combines such features as reliability, functionality, durability and elegance.

Midi tower

Pre-installed fan

2xUSB 3.0

# Mini Trend air

MODECOM MINI TREND AIR is a successor of MINI TREND computer case which gained popularity among customers. Thanks to small size and smart looks, MINI TREND AIR computer case will be perfect for both home and office. Despite small size, the case is very spacious and functional. It will contain all necessary components. Very good airflow is provided by a 8 cm fan mounted on the back. In order to provide better conditions for airflow, power supply unit and optical drive are mounted on the top. Minimalistic black design and silver-coloured audio ports will be astonishing.

# power supplies

# MC-S85-500

It is not easy to choose the right hardware in today's extremely competitive environment of PC components. It's hard to choose the right power supply unit being one of the key components providing safe usage. The market offers many cheap models of power supply units very often being not only dangerous for the hardware, but also for the user. Regardless of what we need - new quiet computer, contemporary hardware or advanced gamer hardware, we deserve the highest quality at a reasonable price and we have to be sure that the product will meet our needs and provide safe and stable work. Do not risk - choose MODECOM power supply unit of new MC series

Active PFC

# MC-S85-400T

Thanks to extraordinary construction, the combination of real 400W power and high performance, MODECOM MC-S85-400T power supply unit enables free configuration of energy-saving, efficient and stable computer set, which makes it stand out from the competition.

MODECOM MC-S85-400T is a high-class efficient power supply unit. This product is dedicated for those who look for the highest quality at a reasonable price. It is one of those products which make you think you made the right decision!

speakers

# Eclipse 180

Active 2.0 speakers with Bluetooth module are very powerful speakers for audiophiles who don't have too much room to spare for audio system. The set plays surprisingly clear. D-class amplifiers are characterised by high efficiency - they lose very little energy in the form of heat. There are D-class amplifiers reaching above 90% efficiency. High efficiency enables us to limit cooling systems and miniaturise D-class amplifiers.

# MC-HF50.2

MODECOM MC-HF50.2 is a set for the most requiring users. Its construction provides incredibly high sound quality. Its classic design makes it universal and perfect for every interior. Magnificent sound is provided thanks to the audio crossover system. This system consists in crossovers splitting the audio signal into separate frequency bands that can be separately routed to loudspeakers optimized for those bands (from low frequencies to high frequencies). The application of this system requires two independent equalizers in each set, however, each of them deal with the signal processing better than just one equalizer responsible for the whole range of frequency.

# MC-HF30

Active 2.0 speakers are a good set for your home. They'll do great on your desk. The speakers are equipped with sound regulation system, which is a must-have for those who are musical aesthetes.

MDF housing provides good acoustics.

30W

## MC-HF10

MODECOM MC-HF10 speakers are for those who expect highest-quality sound and have limited space for the set at the same time. Their construction provides incredibly high sound quality. Its classic design makes it universal and perfect for every interior. The case was made of MDF providing perfect acoustic parameters. Control panel was placed on one of the speakers, which makes it very easy to access.

Bass & treble  
equalizer

# MC-SF05

MODECOM MC-SF05 is a set for those who look for small-sized speakers with clear sound. The chassis was made of MDF giving perfect acoustic parameters, clear and strong sound during both watching movies, playing games or listening to music. Thanks to their small size, MODECOM MC-SF05 can be used by those who have limited space on their desks. The set is equipped with the highest-quality converters which, despite of low power 2 x 2.5 W, let you experience sound with clear bass while playing games or listening to music. Classic and elegant looks is also a big advantage of the set.

5W  
output power

USB  
powered

# MC-MHF60U

Speakers are equipped with separate converters responsible for medium and high range which makes them generate perfect sound with none of them being dominated by the other. Subwoofer is contained in an MDF chassis.

In order to increase convenience, the set is equipped with wired controller with aluminium backlit volume knob indicating that the set is turned on. There are pitch regulation knobs placed on the back of the subwoofer. One of the most interesting functionalities of the set is USB slot.

It has two functions. One of them is charging various mobile devices, such as smartphones or mp3 players. The second one is connecting Bluetooth module for connecting the source of sound wirelessly.

# MC-TPK1

Wireless MC-TPK1 keyboard is a perfect solution for a living room or a mobile office. Despite its small sizes and light construction, the keyboard has all crucial functions for you to feel comfortable when working with it.

MC-TPK1 keyboard is equipped with the whole set of keys and built-in touchpanel. Accordingly, typing, swiping, zooming or just clicking is very easy and convenient.

Instant multimedia functions activation lets you access the Internet or your favourite videos, pictures and music.

# MC-TPK2 Voyager

MODECOM MC-TPK2 keyboard is equipped with a full set of keys based on scissor-switch mechanism. This type of mechanism is recommended to those who value aesthetics and convenience in use. Employing scissor-switch mechanism let us reduce the size of keys and keyboard itself.

This type of solution is commonly employed in high-class laptops and low-profile keyboards. It's characterised by high durability compared to classic membrane keyboards. Scissor-switch mechanism also provides nice feeling when typing. Keys are LED backlit enabling you to work at night without the need for additional light.
